Ensuring that The Just2easy Toolsuite works properly with your school's USO logins

There are three steps to ensure that The Just2easy Toolsuite works effectively with your schools USO logins:-

Each of these steps will need to be performed by the school's data controller. This is most often the Head at the school.

It is quite possible that steps 1 and 2 have already been enabled, but they must be enabled before step 3 can be approved.

The data controller will need to follow the links and instructions in each of the steps below.

1. Ensure "**Autoupdate**" is enabled, also ensure that the following are enabled "**Atomwide Classes**", "**Atomwide Student<>Class link**s" and "**Atomwide Group Supervisors**" :- https://support.lgfl.org.uk/secure/user/au/au_settings.aspx

2. Ensure "**Data release**" is enabled. Please select "**Data release self determination**" from https://support.lgfl.org.uk/secure/myacc/htnc/declarations.aspx

3. Ensure "**Data release**" is approved for **j2e**. Please select the

"**User accounts: Federation data release**" page at
https://support.lgfl.org.uk/secure/user/fed/data_release.aspx

ensure that the data release to "**j2e (LGfL Creative Toolkit)**" becomes enabled.

If you are having any problems with any of the above please contact either support@j2e.com or "the LGfL Service Desk".
