OVERVIEW

The j2e Tool Suite is a collection of online educational tools designed to engage, motivate and inspire.

Text, graphics, animations, sounds, videos, and embedded objects can be combined on a single page; you have unlimited storage for your files (making for impressive e-portfolios), and you can blog at the click of a button.

But are you making the most of the suite? There are so many ways to enrich teaching & learning. Come and find out more.

WHO SHOULD ATTEND?

Whether you are a classroom teacher, senior leader or teaching assistant, this one-day course will leave you with lots of ideas to take back to school with you.

WHAT WILL I LEARN?

✔ Using AutoUpdate to automatically synch teacher and student accounts, allowing you to focus on what's important

✔ Use the user-friendly, unlimited storage in My Files to manage multi-user iPad use

✔ How the app allows multiple users to work on class iPads but save files centrally

✔ How to blog in a school-safe way at the click of a mouse

✔ Use j2launch as a whole-school platform

✔ j2review for assessment tracking

✔ Specialist tools for EYFS

✔ Not to mention the main tools themselves: j2e5, j2code, j2webby, j2bloggy, j2data, j2spotlight, j2measure, and more!

HOW WILL IT CHANGE MY TEACHING?

The more you develop your understanding of the j2e Tool Suite, the more you will be able to unlock your pupils' creativity rather than rely on your own (at all hours and under the daily pressures all teachers face).

If you have an iPad or other tablet, please bring it with you on the day.

THE TRAINER

DANNY YOUNG is the founder and Managing Director of Just2Easy, the makers of the j2e Tool Suite.

Danny set up Just2Easy in 1998 to bridge the edtech gap he recognised at the time.

Since then, the company has worked to constantly update the platform to meet the evolving needs of schools. For Danny, it's all about ensuring that teaching & learning drive technology, and not vice versa.
